Opportunity Summary

The American National Election Studies (ANES) is a national personal survey of the United States adult population that collects data on a wide range of topics concerning public opinion, political participation, and voter choice. Since 1948, ANES has gathered data on these topics around presidential elections using a pre-election and post-election design where the respondents are re-interviewed. This nationally representative survey is known for both its continuity in questions as well as innovation in questions, formats, samples, etc. It is a “gold standard” survey. The National Science Foundation has been supporting this effort since 1970.

The Political Science Program in the Directorate for Social, Behavioral and Economic Sciences invites investigators who possess the theoretical, methodological, measurement, and managerial skills, as well as the institutional resources, to submit proposals to conduct the American National Elections Study (ANES) in one of two modes:

1. **ANES Face-to-Face:** Support to continue the ANES time series using face to face interviewing.
2. **ANES Web:** Support to conduct a web version of the ANES time series.

Eligibility & Requirements:
Principal Investigators and co-principal investigators are restricted to submitting only one proposal for this solicitation.

Internal Nomination Process:
Interested applicants should submit the following documents:

1. **JHU Limited Submission Cover Sheet**
2. Proposal (maximum of two pages of text only, single spaced: 12-pt font and one-inch margins)
   
   (Note: figures, tables, and other reference material may be included in addition to the 2 pg. text limit)
3. Curriculum Vitae of investigator, including current external research support and publications
4. Budget (two pages maximum)
