JHCRN ICTR
WILL FUND 1-3 PROJECTS UP TO $50,000
Clinical and community-based research, practice-based research and health services research are encouraged

The Johns Hopkins Clinical Research Network (JHCRN) of the Johns Hopkins Institute for Clinical and Translational Research announced a new grant funding opportunity to promote inter-institutional research collaborations between Johns Hopkins Medicine and JHCRN affiliated institutions.

This grant, Research Accelerator and Mentorship Program, will fund 1 to 3 projects, up to $50,000 over a 12-month period. Proposals including clinical and community-based research, practice-based research, and health services research are encouraged.

Applications are now being requested. Letters of intent are due by December 1, 2017 and complete applications are due by January 19, 2018. Eligible applicants include Johns Hopkins University faculty and JHCRN affiliate institution staff. Principal investigators are required to involve a minimum of 1 JHCRN affiliate institution co-investigator. JHCRN affiliated institutions include: Anne Arundel Medical Center, Inova Health System, Peninsula Regional Medical Center, Reading Health System, and Allegheny Health System.
