National Institutes of Health (NIH) Cancer Prevention Clinical Trials Network (CP-CTNet): Data Management, Auditing, and Coordinating Center (DMACC) (U24 Clinical Trial Required)

Deadlines:
- Internal Application: October 23, 2018
- Full Application: November 15, 2018

Estimated Award Amount: $8,850,000 (direct costs only)

JHU Nomination Limit: 1

Opportunity Summary:
Through this funding opportunity announcement (FOA), the National Cancer Institute (NCI) proposes and will support the Cancer Prevention Clinical Trials Network (CP-CTNet), for which the goals are as follows:

- Design and conduct of early phase clinical trials to assess the safety, tolerability, and cancer preventive potential of agents and interventions of varying classes, many of which target molecules or processes known to be important during carcinogenesis. These trials include phase 0 (micro-dosing), phase I (dose-finding), and phase II (preliminary efficacy) clinical trials.
- Characterization of the effects of these agents and interventions on their molecular targets, as well as on other biological events associated with cancer development (such as cell proliferation, apoptosis, growth factor expression, oncogene expression, immune response) and correlation of these effects with clinical endpoints.

Development of further scientific insights into the mechanisms of cancer prevention by the agents examined, including the development of novel potential markers as determinants of response.

CP-CTNet consists of two types of components:

- Five CP-CTNet Sites (covered by companion FOA, RFA-CA-18-029); and
- One CP-CTNet Data Management, Auditing, and Coordinating Center (DMACC, covered by this FOA).

The CP-CTNet Sites will provide scientific leadership in development and conduct of early phase cancer prevention clinical trials as well as in the management and analysis of the data. The DMACC will support the CP-CTNet Sites and coordinate trans-Network activities with the following specific responsibilities:

(i) centralized data management and data reporting,
(ii) clinical trials auditing,
(iii) administrative and logistical coordination across CP-CTNet.

Eligibility & Requirements:
- Any individual(s) designated as PD(s)/PI(s) for the CP-CTNet DMACC must have their primary affiliation at the application-submitting institution.
- The PDs/PIs of applications submitted in response to this FOA must not be named as Senior/Key Personnel or Other Significant Contributors on any teams submitting applications to the companion FOA, RFA-CA-18-029.

Internal Nomination Process:
Interested applicants should submit the following documents:

1. JHU Limited Submission Cover Sheet
2. Proposal (maximum of two pages of text only, single spaced: 12-pt font and one-inch margins) (Note: figures, tables, and other reference material may be included in addition to the 2 pg. text limit)
3. Curriculum Vitae of investigator, including current external research support and publications
4. Budget (two pages maximum)
