**Deadlines:**
- Internal Application: January 24, 2019  
- Nominations Due: March 15, 2019  
- Sponsor Deadline: April 20, 2019

**Opportunity Summary:**
The Packard Fellowships for Science and Engineering program invests in future leaders who have the freedom to take risks, explore new frontiers in their fields of study, and follow uncharted paths that may lead to groundbreaking discoveries.

A list of fifteen (15) prior JHU awardees can be found [here](#).

**Eligibility & Requirements:**
- Candidates must be faculty members who are eligible to serve as principal investigators engaged in research in the natural and physical sciences or engineering.
  - Disciplines that will be considered include physics, chemistry, mathematics, biology, astronomy, computer science, earth science, ocean science, and all branches of engineering.
  - Candidates engaged in research in the social sciences will not be considered.
- Candidates must be within the first three years of their faculty careers (initial faculty appointments began no earlier than May 31, 2016 and no later than May 31, 2019.)
- Faculty members who are well established and well-funded are less likely to receive the award
- Recognizing that certain areas of contemporary science and engineering already have access to relatively generous funding (for example, clinical research, research associated with the design and construction of large national facilities such as accelerators and space stations, and applied research of direct relevance to national security), the Packard Fellowships are directed to other, less generously supported fields.

**Internal Nomination Process:**
Interested applicants should submit the following documents:

1. Research statement describing why the research is important, five-year goals and how funds will generally be used (maximum of two pages of text, single-spaced, 12-pt font and 1-inch margins)  
   (Note: figures, tables, and other reference material may be included in addition to the two page text limit)
2. CV of nominee, including current external research support, educational background, publications, professional positions, and honors and awards
3. Letter of recommendation from department chair
4. Three (3) letters of recommendation from people outside of JHU (at least one recommendation must be from a person who has had no supervisory of collaborative contact with the nominee)

**To apply, email FoundationRelations@jhu.edu.**
