Opportunity Summary:
This Funding Opportunity Announcement invites applications to upgrade or expand non-human primate (NHP) facilities. The objective is to modernize physical infrastructure supporting research that is aligned with the NIH-established priorities areas for HIV/AIDS research. Improvement in the physical infrastructure of NHP facilities will contribute to the continued availability of high-quality animal models and help advance HIV/AIDS-related research activities.

The scope of individual improvement projects will vary and depend on the currently-available infrastructure at the applicant institution, as well as its present and anticipated HIV/AIDS-related research needs. Any request must be justified by research-related needs for the care and maintenance of animals or for research-related activities directly associated with the NHP facility. Any project, when completed, should provide long-term benefits to the operations and uses of the facility.

Eligibility & Requirements:
- PDs/PIs are strongly encouraged to contact the Scientific/Research Agency Contact to discuss their planned projects before submitting applications.
- The PD/PI should hold appropriate stature within the institutional administration structure and non-human primate HIV/AIDS-related research community to be able to oversee various facets of the entire project.
- Applications with budget less than $2,000,000 will not be considered.

Internal Nomination Process:
Interested applicants should submit the following documents:
1. JHU Limited Submission Cover Sheet
2. Proposal (maximum of two pages of text only, single spaced: 12-pt font and one-inch margins) (Note: figures, tables, and other reference material may be included in addition to the 2 pg. text limit)
3. Curriculum Vitae of investigator, including current external research support and publications
4. Budget (two pages maximum)
