Limited Submissions
Sponsor: Robert Wood Johnson Foundation
Program: Climate and Health Solutions Grants

Estimated Award Amount: $350,000 over 2 years
JHU Nomination Limit: 1
For More Detailed Information Click Here

Opportunity Summary:
RWJF seeks proposals from communities or organizations across the United States that: (1) have developed and implemented approaches that address the health impacts of climate change, while improving health equity, and (2) want to build evidence around those kinds of approaches. Eligible, local approaches can focus on one or more of a range of determinants of health—including, but not limited to: air quality; energy sources; transportation or mobility design; food and water systems; housing; and health systems. Grant funds will support research and evaluation activities, with some funds allocated to communication and dissemination efforts to share findings and lessons learned broadly.

RWJF will host two informational webinars about this RFP:
Monday, 1/7, 3:00-4:30 pm ET (register here) and Tuesday, 1/15, 8:00-9:30 pm ET (register here).

Eligibility & Requirements:
• Applicants must have an intervention or approach with a substantial period of implementation (1 year minimum implementation as of date of application)
• Proposals must discuss approaches focused in one or more geographically defined communities.
• The community or organization implementing the approaches to address the health impacts of climate change, while improving health equity, must serve as the primary applicant (Project Director), and will be the prime recipient of funds. Individuals from collaborating organizations (e.g. research partner) can serve as the co-Project Director.

Internal Nomination Process:
Interested applicants should submit the following documents:

1. JHU Limited Submission Cover Sheet
2. Proposal narrative of no more than 4 pages, including:
   a. Overview of the project design
   b. Description of the approach to addressing the health impacts of climate change, while improving health equity, that has been implemented in the given geographically-defined community, with a description of the determinant(s) of health being addressed by this approach
   c. Research or evaluation question(s) to be investigated, and a brief overview of the research methods (including any existing data sources that may be leveraged)
   d. Overview of project personnel, including any collaborating individuals and/or organizations
   e. Overview of the communication and dissemination plan
3. Curriculum Vitae of up to five project personnel

To apply, email FoundationRelations@jhu.edu.
